User requirements
- Goal: To aid in studying naming compounds (in junior high chemistry)
    - Name/Formula of compound
    - Properties of compound
    - Rules for naming compounds
        - Electron configuration?

System Design
(User interface)
- Screen
    - Default screen (Ex. Closing X button)
    - Periodic table (Find a picture → Cut those in pieces?)
        - Na
        - Sodium
        - Number of protons (AKA electrons)
        - Ion charges on top
        - Alkali metal
    - Bohr-Rutherford diagram (or Lewis) for electrons?
    - Name of compound
    - Formula of compound
    - Properties of compound
    - Restart button
- Mouse
    - Closing the screen (Clicking X)
    - Clicking elements on periodic table
    - Clicking restart button
- Keyboard?
